

Replaceable Chambers

Fly through maintenance calls with the industry's first replaceable smoke chamber. No more blowing out dust and hoping for the best. Now you can be a hero by keeping detectors clean and your systems green — for a fraction of the usual cost.

All detectors get dirty. And they don't clean themselves. But Kidde has the next best thing... the patented replaceable optical chamber. Now you can refurbish aging detectors and instantly restore their sensitivity to optimum levels. Even the dustiest, grimeiest detectors can perform like new!

V-PCOS Detector

V-PS Chambers

No muss, no fuss: Kidde's exclusive replaceable smoke chambers takes less than sixty seconds to install. Simply pop off the cover and remove the old chamber, brush out the inner housing to remove loose dust, slide in the new chamber, replace the cover and reset. Done and dusted!

I run device reports before and after servicing to demonstrate the performance gain achieved as a direct result of smoke chamber replacement.

Replaceable chambers are available on select Kidde detectors. Ask your Kidde Dealer how you can ensure your facility benefits from this cost-saving innovation.

What's your story?

Everybody has one to tell: resources stretched too thin; compliance headaches; not enough hours in the day. Some are more difficult to manage than others. But when it comes to life safety, every one needs to line up.

Kidde fire alarm solutions are in lockstep with your story because we listen. With technology built specifically for the needs of building owners, contractors, and engineers, we know what it takes to craft a fire alarm solution — no matter what your story is. Tell us yours. Contact your Kidde Engineered Systems Dealer today.

...and see what's possible now.
