Stylish

Genesis Series® Emergency Signals

See what's possible now.

signals with style

Model of discretion:
Slim and discreet, Genesis horn-strobes complement any decor (shown actual size).

The award-winning Genesis line of products represents the rebirth of emergency signals with looks, features, and performance benefits designed with your project in mind. Wall strobes, horns, and chimes about the size of a deck of playing cards offer a discreet alternative to bulky devices, while speakers and ceiling models with clean modern lines blend inconspicuously with their surroundings.

Signaling on-demand

Though designed for discretion, Genesis signals are also engineered to command attention. Wall-penetrating low frequency output and patented *FullLight* strobe technology immerse the protected area with levels of light and sound that simply can't be ignored, while meeting the latest standards for sleeping areas and locations with high ambient sound.

Genesis brings on-demand signaling to every application with an unparalleled range of field-configurable options: horns and chimes with high/low dB output settings; speakers with multiple wattage tap and voltage selections; and strobes with selectable candela output and

Genesis output levels are changed by simply opening the device and sliding the selectors to the desired settings. Settings remain visible through small windows on the device even after the cover is closed.

Genesis wall and ceiling signals may be ordered with optional "FIRE" or "ALERT" markings. Models are available with housings in fire alarm red or architecturally pleasing white.

Optional trim plates for wall horns, chimes, and strobes are ideal for covering openings left behind during retrofits; red or white models are available with or without "FIRE" marking.

Ceiling models are suitable and fully listed for wall mount applications.

flash rate – options that put you in the driver’s seat when time is short, budgets slim, and manpower at a premium. It also means fewer parts to stock, less inventory to worry about, and the flexibility to meet changing demands – on the fly – without having to reinstall equipment or order more parts!

Innovative features

The Genesis G4E Strobe Expander offers both Mass Notification and Life Safety System notification capabilities by providing a separate, independently-controlled strobe that fits readily behind a Genesis speaker or speaker-strobe.

Application flexibility

Whether you’re designing for a new landmark structure, or simply retrofitting a local strip mall, competitively-priced Genesis signals bring value, good looks, and installation flexibility to every application. Contact Kidde today to learn how your signal solutions can be the model of discretion.

Kidde fire alarm control panels and booster power supplies feature built-in precision synchronization for Genesis strobes, speaker-strobes, chime-strobes, and horn-strobes.

Genesis low frequency appliances feature distinctive 520 Hz sound output that meets the latest NFPA 720 requirements for certain sleeping areas.

Strobes

- Selectable 15-177 candela output
- Fixed 15/75 candela models available
- Selectable temporal flash for private mode signaling
- Precision synchronization
- Wall models: strobe, horn-strobe (shown), speaker-strobe, chime-strobe
- Ceiling models: strobe, horn-strobe, speaker-strobe
- Outdoor models: horn, horn-strobe (shown)

Horns

- High/low dB output
- 520 Hz models meet NFPA 720
- Coded or non-coded operation
- Independent horn control over a single pair of wires
- Wall models: temporal horn, steady horn, horn-strobe
- Ceiling models: horn-strobe (shown)

Speakers

- Four selectable wattage taps
- 520 Hz models meet NFPA 720
- Wall models: speaker, speaker-strobe (shown)
- Ceiling models: speaker, speaker-strobe
- Outdoor models: fire alarm and mass notification speaker, speaker-strobe (shown)

Chimes

- High/low dB output
- Temporal output or 60 strokes per minute
- Coded or non-coded operation
- Wall models: chime, chime-strobe (shown)

Genesis speakers, horns, and strobes with amber lenses and optional “ALERT” lettering are ideal for applications that require differentiation between fire alarm and mass notification alerts.

Value, efficiency, and a legacy of fire protection innovation

When building owners and designers do business with Kidde, their investment is underwritten by a 100-year history of dedication to the fire alarm industry. That's why today architects and engineers agree that when it comes to protecting people and property, Kidde life safety systems remain the technology of choice.

Our strength is in our dealer network — the people and organizations we entrust with the technology that has charted the course of detection and alarm for decades. Kidde Engineered Systems Dealers are independent contractors who add value to the Kidde life safety solution. They enjoy exclusive access to products, custom design innovations, and factory training — and they are adept at ensuring that each proposal is strong and competitive.

These strengths set Kidde installations apart, and have earned this brand a special place among life safety solutions available today.
